GUIDE

ALFALFA

TIPS

Seeding Rate:
18-20 lb/ac,
or 8-10 lb/mix

Planting dates:
March-April
August-September

Enduro 423 AP Alfalfa - All Purpose Alfalfa

- Non-GMO
- FD 4.5, 1.7 WSI
- DRI - 39/40
- Resistance to Aphanomyces - root rot race 1, 2, and 3
- Sunken crown variety with branch roots
- Fast recovery after cutting
- Excellent yield potential
- High forage quality

Enduro 442 HD - Highly Digestible

- Non-GMO
- FD 4.3, 1.5 WSI
- DRI - 34/35
- High yielding
- Fast recovery after cutting
- High multi-leaf expression
- More milk per acre

Enduro 439 LHR - Potato Leafhopper Resistant

- Non-GMO
- FD 3.9, 1.8 WSI
- DRI - 34/35
- 8th generation potato leafhopper resistance
- Very good forage quality
- High yield potential

Enduro 525 HD - High Forage Yield Alfalfa

- Non-GMO
- FD 4.9, 1.1 WSI
- DRI - 33/35
- Very aggressive and fast recovery
- Harvest 25-30 days for best forage and yield quality
- Root - tap
- Excellent yield and quality potential

• PERENNIAL MIXES •

Horse Hay Mix

58% Enduro 439 LHR Alfalfa, 19% Devour Late-Maturing Orchardgrass, 15% Albion Perennial Tetraploid Ryegrass, 8% Catapult Timothy

25lb/ac; plant late March–April, late August–mid September

- Proper mixture of alfalfa and grass for great horse hay
- Includes potato leafhopper resistant alfalfa for premium forage quality
- Works best in well drained soil
- Properly balanced forage for equine; flexible forage mix for all species
- Can also be used as rotationally grazed pasture

Dry Hay Grass Mix

35% Big Gains Meadow Fescue, 20% Devour Late-Maturing Orchardgrass, 15% Endurance Grazing Type Orchardgrass, 15% Mahulena Festulolium, 15% Catapult Timothy

20 lb/ac alone; 10-15 lb / ac with 10-15 lbs of alfalfa

- Excellent companion for alfalfa
- Flexible all-grass hay option
- Season long production
- Outstanding winterhardiness
- Responds well to nitrogen/manure applications
- Can also be used as rotationally grazed pasture

Beef Pasture Mix

50% Bronson Endo-Free Tall Fescue, 40% Force Tall Fescue, 8.5% Bearcat Red Clover, 1.5% Jumbo II Ladino Clover

30-35 lb/ac; plant late March–early May, August–September

- Formulated for top animal production for beef producers
- Works well for hay or grazing
- Can be stockpiled
- Soft, highly palatable fescues
- Best to rotationally graze

Sheep & Goat Pasture Mix

20% Devour Late-Maturing Orchardgrass, 20% Big Gains Meadow Fescue, 20% Bronson Endo-Free Tall Fescue, 15% Birdsfoot Trefoil, 10% Balin Ky Bluegrass, 5% Endure Chicory, 5% New Zealand White Clover, 5% Stamina White Clover

25 lb/ac; plant April-May, August-September

- Excellent grass/legume mix for sheep and goats
- High quality season long pasture
- Good mix to handle summer stress

• PERENNIAL MIXES •

Hay & Graze Clover Mix

70% Bearcat Red Clover, 30% Stamina White Clover

5-8 lb/ac; Frost seed mid February–mid March, Spring seed April–mid May, Summer seed August–mid September

- Mix of outstanding clovers formulated at just the right percentage to give the best benefit for production livestock managers
- Overseed grass pastures
- Great for frost seeding
- Proper ratio of red to white clover
- Helps reduce the effect of endophyte fungus found in infected KY-31 tall fescue

Premium Pasture Mix

50% Enduro 442 HD Alfalfa, 30% Bearcat Red Clover, 10% Catapult Timothy, 5% White Clover, 5% Devour Late-Maturing Orchardgrass

15-18 lb/ac; plant April–May, August–early September

- All top producing, value added forage varieties - no cheap fillers
- Balanced alfalfa/clover/grass mix for flexible use as hay or pasture
- Can be used for a legume base to add selected forage grasses for permanent pasture

Baler Mix

65% Enduro 439 LHR Alfalfa, 20% Bearcat Red Clover, 10% Catapult Early-Maturing Timothy, 5% Endurance Late-Maturing Orchardgrass

20-25 lb/ac; plant April–May, August–early September

- All top producing, value added forage varieties - no cheap fillers
- Can be baled, chopped, or used for pasture
- Very flexible mix that is inoculated and ready to be planted

Haymaster Grass Mix

50% MacBeth/Torsion Brome, 50% Laura/Big Gains Meadow Fescue

10-15 lb/ac sown with alfalfa, 25-30 lb/ac for grass hay; plant April–May, August–September

- Maturity matches well with alfalfa
- All grass hay option
- Hardy species for multi-cut mixture
- Outstanding winterhardiness
- Responds well to nitrogen/manure applications
- Produces under tough hot, dry conditions

We reserve the right to substitute as good as or better varieties if there are supply challenges with the varieties in the above mixtures

CLOVER

Rancher Red Clover

10-14 lb/ac pure stand; 4-6 lb/ac when overseeding;
plant Jan–April, Aug–Sept

- Vigorous growth
- High forage quality
- Pairs well with cool-season grasses
- Nitrogen producer
- Improves soil health

Bearcat Red Clover

10-14 lb/ac pure stand; 4-6 lb/ac when overseeding;
plant Jan–April, Aug–Sept

- True multi-year red clover
- Excellent disease resistance and stand persistence
- Excellent grazing tolerance
- Aggressive regrowth
- High yielding forage

ANNUAL MIXES

Milk Maker

50% Elevator Triticale, 50% Stockade Field Peas

100-120 lb/ac for a forage crop; 50–70 lbs/ac for a nurse crop;
plant March–April, August

- 60 days from emergence to harvest; best when triticale is in the boot stage
- High quality haylage for improved animal performance
- Great nurse crop for a forage seeding
- Fits well before or after a summer annual crop
- Tolerates frost or light freeze

Partner Pea/Oat Mix

50% Haywire (or other) Forage Oats, 50% Stockade Field Peas

100-120 lb/ac; plant March–April, August

- 60 days from emergence to harvest; best when oats are in the boot stage
- High quality haylage
- Fits well before or after a summer annual crop
- Tolerates frost or light freeze
- Spectacular yield & quality with Haywire Oats

Udder Filler

70% Elevator Triticale, 30% Winterhawk/Bruiser/Centurion Annual Ryegrass

100-120 lb/ac; plant March–April, August

- Fast forage, ready in 60-80 days
- Responds well to nitrogen/manure applications
- For haylage/silage/green-chop
- High energy and NDF levels
- High protein with proper fertilization

Enduro Plus®

Brand Forage Products

Enduro Plus® consists of only the best forage varieties available. All varieties in the Enduro Plus product line have been developed and tested for forage quality, yield, and persistence. These products have been designed to give you higher relative feed values, which translates into more milk per acre, more beef per acre, or more energy for horses.
